

MELVIN V

Software Developer

Bangalore, Karnataka, India | +91 7022224871 | melvinvenk707@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer with hands-on experience across the full Software Development Life Cycle (SDLC) — designing, developing, debugging, and optimizing scalable full-stack and distributed applications. Skilled in Java, Python, JavaScript/TypeScript, React, and SQL, with proven experience building and integrating REST APIs and microservices, designing relational and NoSQL databases, and applying object-oriented programming and software architecture principles to deliver maintainable, production-ready code. Experienced working in Agile/Scrum teams, writing unit tests, and using Git for version control and Docker/Kubernetes for cloud-native deployment. Strong analytical thinker with a track record of improving application performance, reducing technical debt, and shipping features ahead of schedule.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, C, C++

Frontend Development: React, Redux, Tailwind CSS, Bootstrap, Three.js, WebGL, Responsive/Component-Based UI Design

Backend & API Development: REST APIs, FastAPI, Flask, Django, Spring Boot, Node.js, Express.js, Microservices, API Integration, Authentication

Databases: PostgreSQL, MySQL, MongoDB, SQLite, SQL, Relational & NoSQL Database Design

Cloud, DevOps & Tools: Docker, Kubernetes, Git, GitHub, GitHub Actions, Postman, VS Code, CI/CD-ready Deployment (Vercel, Render, Neon), Android Studio

AI / Machine Learning: Machine Learning, Natural Language Processing, Computer Vision, Scikit-learn, Pandas, NumPy, Matplotlib, Hugging Face Transformers, Sentence Transformers, spaCy, KeyBERT, FAISS, NLTK, OpenCV, MediaPipe, Librosa

Software Engineering Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Architecture, Distributed Systems, Scalable Application Design, Agile/Scrum, SDLC, Debugging & Performance Optimization, Unit Testing

PROFESSIONAL EXPERIENCE

Software Development Engineer (SDE) Intern — BlueStock Fintech

Nov 2025 – Dec 2025 | Bangalore, India

- Designed and developed full-stack features for 2+ production fintech web applications using React, Redux, and Tailwind CSS, applying object-oriented and modular software architecture principles.
- Built 5+ reusable, responsive UI components and integrated 10+ RESTful API endpoints, troubleshooting data-flow issues to ensure seamless frontend-backend communication.
- Optimized API data fetching and state-management logic, debugging performance bottlenecks and reducing page load time by 20%.
- Processed and validated 1,000+ records of API data, strengthening data accuracy and reliability across frontend rendering.
- Collaborated within a 4-member Agile/Scrum team across full SDLC cycles, delivering scalable application features ahead of sprint deadlines.
- Authored 20+ unit tests and technical documentation; led design reviews and proposed architectural improvements that reduced technical debt and improved code maintainability.

Java Developer Intern — InternzLearnz

May 2024 – Jun 2024 | Bangalore, India

- Debugged and refactored 3+ Java application modules using OOP principles, resolving 15+ performance bottlenecks and reducing system latency by 15%.
- Applied software architecture and design best practices to backend logic, improving code scalability and maintainability in line with industry-standard engineering practices.

3D Environment Artist — One Move Studios

Jan 2022 – Dec 2022 | Bangalore, India

- Created and delivered production-ready, optimized 3D environments and modular assets using Blender, Maya, and Unreal Engine, collaborating cross-functionally with animators to meet project deadlines.

PROJECTS

HireScope – AI-Powered Resume Analyzer & ATS Optimization Platform

[GitHub](#) | [Live Demo](#) | 2026

- Built a full-stack platform that analyzes resumes against job descriptions using an NLP pipeline (spaCy, KeyBERT, FlashText) to generate ATS compatibility scores, skill-gap analysis, and personalized recommendations.
- Designed and implemented secure REST APIs with FastAPI for resume parsing, authentication, and job matching, backed by a PostgreSQL database.

- Developed a responsive React and TypeScript frontend with real-time feedback dashboards, PDF resume upload, and detailed analytics.
- Containerized the application with Docker and deployed a production stack (Vercel, Render, Neon), resolving CORS and dependency-compatibility issues for reliable delivery.

SpideR – Distributed Web Search Engine [GitHub](#) | 2026

- Built a cross-platform desktop search application using PyQt6, featuring global hotkeys, system tray integration, and a native UI for instant local file and content search.
- Implemented a hybrid keyword + semantic search engine using FAISS vector indexing and Sentence Transformers (all-MiniLM-L6-v2), enabling accurate retrieval beyond exact keyword matches.
- Packaged the application into a standalone .exe using PyInstaller, allowing distribution and use on machines without a Python environment installed.

AutoDealer Hub – Full-Stack Dealership Review Platform [GitHub](#) | 2025

- Designed a distributed, microservices-based platform for dealership browsing, customer reviews, and sentiment analysis, integrating React, Django, Node.js/Express, and Flask services.
- Modeled and managed application data in MongoDB; containerized services with Docker and orchestrated deployment with Kubernetes.

QuickShop – Multi-Vendor E-Commerce Platform [GitHub](#) | 2026

- Built a full-stack Django marketplace supporting role-based access for consumers and sellers, covering product listings, orders, wishlists, and simulated payments.
- Designed relational schemas in SQLite and implemented a responsive HTML/CSS/JavaScript frontend for catalog browsing and checkout flows.

Audio Deepfake Detection (Research) [GitHub](#) | 2025 - 2026

- Engineered an ML pipeline using paralinguistic feature extraction and SVM classifiers for synthetic audio detection, achieving ~94% classification accuracy, with a Flask backend integrating Librosa for real-time audio feature extraction.

Air Paint – Gesture-Controlled Drawing App [GitHub](#) | 2025

- Built a real-time gesture-controlled drawing application using OpenCV and MediaPipe hand-landmark detection for webcam-based finger tracking.

EDUCATION

M.Sc. Computer Science – St. Joseph's University

2024 – 2026 | Bangalore, India CGPA: 7.75

BCA (Bachelor of Computer Applications) – St. Francis College

2021 – 2024 | Bangalore, India CGPA: 7.68

CERTIFICATIONS

- Data Process & Business Analytics training – Anudip Foundation 2026
- IBM Full Stack Software Developer Professional Certificate – IBM | Coursera 2025 – 2026
- jQuery Certificate – Infosys Springboard 2025
- Web Development with Python Certificate – TechByHeart 2023
