

MELVIN V

Software Developer

Bangalore, Karnataka, India | +91 7022224871 | melvinvenk707@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer with hands-on experience across the full Software Development Life Cycle (SDLC) — designing, developing, debugging, and optimizing scalable full-stack applications. Skilled in Java, Python, JavaScript, React, and SQL, with proven experience building and integrating REST APIs, designing relational databases, and applying object-oriented programming and software architecture principles to deliver maintainable, production-ready code. Experienced working in Agile/Scrum teams, writing unit tests, and using Git for version control and Docker/Kubernetes for cloud-native deployment. Strong analytical thinker with a track record of improving application performance, reducing technical debt, and shipping features ahead of schedule.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), SQL, HTML5, CSS3, C, C++

Frontend Development: React, Redux, Tailwind CSS, Bootstrap, Three.js, Responsive/Component-Based UI Design

Backend & API Development: REST APIs, FastAPI, Flask, Spring Boot, API Integration, Authentication

Databases: PostgreSQL, MySQL, SQL, Relational Database Design

Cloud, DevOps & Tools: Docker, Kubernetes, Git, GitHub, Postman, VS Code, CI/CD-ready Deployment (Vercel, Render, Neon), Android Studio

Data Science & Machine Learning: Scikit-learn, Pandas, NumPy, Matplotlib, NLTK, spaCy, KeyBERT, OpenCV, MediaPipe, Librosa, Sentence Transformers, FAISS

Software Engineering Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Architecture, Distributed Systems, Scalable Application Design, Agile/Scrum, SDLC, Debugging & Performance Optimization, Unit Testing

PROFESSIONAL EXPERIENCE

Software Development Engineer (SDE) Intern — BlueStock Fintech

Nov 2025 – Dec 2025 | Bangalore, India

- Designed and developed full-stack features for 2+ production fintech web applications using React, Redux, and Tailwind CSS, applying object-oriented and modular software architecture principles.
- Built 5+ reusable, responsive UI components and integrated 10+ RESTful API endpoints, troubleshooting data-flow issues to ensure seamless frontend-backend communication.
- Optimized API data fetching and state-management logic, debugging performance bottlenecks and reducing page load time by 20%.
- Processed and validated 1,000+ records of API data, strengthening data accuracy and reliability across frontend rendering.
- Collaborated within a 4-member Agile/Scrum team across full SDLC cycles, delivering scalable application features ahead of sprint deadlines.
- Authored 20+ unit tests and technical documentation; led design reviews and proposed architectural improvements that reduced technical debt and improved code maintainability.

Java Developer Intern — InternzLearnz

May 2024 – Jun 2024 | Bangalore, India

- Debugged and refactored 3+ Java application modules using OOP principles, resolving 15+ performance bottlenecks and reducing system latency by 15%.
- Applied software architecture and design best practices to backend logic, improving code scalability and maintainability in line with industry-standard engineering practices.

3D Environment Artist — One Move Studios

Jan 2022 – Dec 2022 | Bangalore, India

- Created and delivered production-ready, optimized 3D environments and modular assets using Blender, Maya, and Unreal Engine, collaborating cross-functionally with animators to meet project deadlines.

PROJECTS

HireScope — AI-Powered Resume Analyzer & ATS Optimization Platform | [Live Demo](#)

2026

- Built a full-stack platform that analyzes resumes against job descriptions using an NLP pipeline (spaCy, KeyBERT) to generate ATS compatibility scores, skill-gap analysis, and personalized recommendations.

- Designed and implemented secure REST APIs with FastAPI for resume parsing, authentication, and job matching, backed by a PostgreSQL database.
- Developed a responsive React and TypeScript frontend with real-time feedback dashboards, PDF resume upload, and detailed analytics.
- Containerized the application with Docker and deployed a production stack (Vercel, Render, Neon), resolving CORS and dependency-compatibility issues for reliable delivery.

SpiderR – Distributed Web Search Engine2026

- Architected a distributed, Google-inspired search engine using FastAPI, React/TypeScript, Elasticsearch, PostgreSQL, Redis, and Celery for scalable crawling, indexing, and query processing.
- Implemented PageRank-based relevance ranking and a semantic search layer using Sentence Transformers and FAISS to improve retrieval accuracy.
- Built fuzzy search, multi-keyword queries, and snippet highlighting; integrated automated parsing and indexing for PDF, DOCX, TXT, and web sources.
- Designed a responsive web interface backed by RESTful APIs, supporting real-time search and result visualization.

Audio Deepfake Detection (Research)2025

- Engineered an ML pipeline using paralinguistic feature extraction and SVM classifiers for synthetic audio detection, achieving ~94% classification accuracy.
- Built a Flask-based backend integrating Librosa for real-time audio feature extraction and analysis.

Car Dealership Web Application2025

- Developed a full-stack web application integrating REST APIs for dealer listings and customer reviews, applying software architecture best practices.
- Built a responsive frontend with React, JavaScript, HTML/CSS, and Bootstrap; debugged backend integration issues for dynamic data handling.
- Containerized and deployed the application using Docker and Kubernetes, using Git/GitHub for version control and team collaboration.

Sentiment Analysis System2025

- Built an NLP preprocessing and model-training pipeline for sentiment classification using NLTK and Scikit-learn, visualized with Matplotlib and Power BI.

Air Paint – Gesture-Controlled Drawing App2025

- Built a real-time gesture-controlled drawing application using OpenCV and MediaPipe hand-landmark detection for webcam-based finger tracking.

EDUCATION

M.Sc. Computer Science – <i>St. Joseph's University</i>	2024 – 2026 Bangalore, India
Current GPA: 7.55	
BCA (Bachelor of Computer Applications) – <i>St. Francis College</i>	2021 – 2024 Bangalore, India
CGPA: 7.68	

CERTIFICATIONS

- 2026: Data Analytics Program – Anudip Foundation
- 2025 – 2026: IBM Full Stack Software Developer Professional Certificate – IBM | Coursera
- 2025: jQuery Certificate – Infosys Springboard
- 2023: Web Development with Python Certificate – TechByHeart
